THE SPECIAL PREFABRICATED HOUSE OF GENBÖCK HAUS FROM UPPER AUSTRIA

Since 1987 the company GENBÖCK HAUS is already successful offerer of completely individually planned prefabricated houses in wood element construction method in Austria. After already one decade firm history 1000 content customers are pleased about own GENBÖCK HAUS. Each house is unique and cut to the customer! To the turn of the millennium the enterprise presented a further milestone with the first passive prefabricated house in Austria. GENBÖCK HAUS attaches great importance to innovation and continuous improvement in prefabricated house construction and developed, for example, already in 2012 a wall of only 34 centimeters thickness with a record-breaking thermal insulation value. In addition to wood, which is the most natural of all materials, ecological materials are increasingly being used in high-quality construction. Individuality is also very important: Thus, in 35 years, more than 3500 unique houses were created according to customer wishes. In 2019, GENBÖCK HAUS fulfilled the dream of a mobile, flexible home with the house of one's own.

// A GUEST AT GENBÖCK HAUS: MINIMUM EFFORT FOR OPTIMUM UNDERSTANDING

In 2018, GENBÖCK HAUS decided to adapt the regular factory tours to the high quality standards of the company: With the TOM-Audio TG-100 from BMS Audio, a professional tour guide system was purchased. The tours are conducted with different group sizes and sometimes take place simultaneously. For this purpose, the TOM-Audio TG-100 provides different channels for several groups at the same time - with easy handling at all times: „The people guidance system benefits optimal communication with minimal effort,“ says Mayor. Herbert Kreuzroither production manager at GENBÖCK HAUS, „The system is definitely a relief!“. Because the tour in the production takes place with increased acoustic stress from the production machines. Without the support of a tour guide system, only small groups were possible in the past and a very loud voice was still an absolute prerequisite.

// „WE AND OUR VISITORS GET ALONG EASILY – IT’S A GREAT FIT!“

The reasons for visiting the prefabricated house production are very diverse: from customers, interested parties to school groups and business groups. The easy handling of the TOM-Audio TG-100 tour guide system is an absolute plus. Herbert Kreuzroither is also delighted that visitors' own headphones can be connected to the equipment at any time. During the guided tours, hardly any questions arise now because the explanations are much better understood. This is why the system from BMS Audio has been in regular use from the very beginning.

“ The tour guide system helps to ensure optimum communication with minimum effort. The system is definitely a relief!

Mayor Herbert Kreuzroither, Production Manager

We are pleased to support the guided tours at GENBÖCK HAUS with the TOM-Audio TG-100 and wish you many successful tours with enthusiastic visitors.
